

AA236A

Alemlube Automotive Automatic Tyre Changer

March 2021

The Alemlube Automotive AA236A automatic tyre changer is a technologically advanced, robustly constructed machine and features a pneumatic operated tilting column with helper arm and tubeless tyre inflating system.

Pneumatic locking of both vertical and horizontal distance and a tyre pressing roller contribute to superior efficiency of the AA236A automatic tyre changer presenting the user with greater time management benefits.

A quick air booster ensures that the tyre and rim are jointed instantly which is especially suitable for working with low profile tyres. The large 26" turntable is another great advantage when the demand for low profile tyre changing is a high priority in the workshop.

Perfectly described as bigger and better, the AA236A automatic tyre changer from Alemlube Automotive with its 360° bending special rotary type shovel press, longer body and longer right helper is today's tyre changer of choice.

SPECIFICATIONS, FEATURES AND BENEFITS

- Pneumatically operated tilting column
- Helping arm with central locking device
- Tubeless tyre inflating device
- Large 26" turntable suitable for low profile tyres
- Maximum wheel diameter 45" (1143mm)
- Maximum wheel width 16" (406mm)
- Outside clamping: 12" - 23"
- Inside clamping: 14" - 26"
- Air supply: 8bar
- Bead breaker force: 2500kg
- High strength steel pedal
- Centering device keep the tyre and turntable in one concentric circle
- Weight of 345kg
