

506202 Samoa Single Arm Composite Oil Hose Reel

October 2025

The 506202 Samoa single arm aluminium composite hose reel is a durable and lightweight composite hose reel designed for efficient handling of oil in typical environments.

Ideal for use in workshops, industrial settings, and service bays, the 506202 is equipped with a 10m x 12mm ID hose and supports various mounting configurations, offering flexibility in installation and use.

Built with a composite spool and aluminium base and arms, this reel combines strength with reduced weight (12.6kg) for easier installation. A fatigue-resistant steel spring ensures reliable and smooth retraction, while the sealed ball bearing system minimises torque load on the spring for longer operational life. The six-roller guide outlet helps prevent hose damage and ensures smooth retraction.

SPECIFICATIONS, FEATURES & BENEFITS

- Hose capacity of 10m x 12mm ID hose
- Suitable for use with oil, air, water, and coolant
- Manufactured in Spain by Samoa
- Lightweight design for easy installation, weight of 12.6kg
- 2,320psi (160bar) hose pressure rating
- 1/2" BSP(m) inlet/outlet
- The reel includes a 0.8m inlet hose for immediate installation
- Composite spool with sealed ball bearings to reduce torque and wear
- The aluminium base and guide arm offer strong yet lightweight support, ideal for versatile installations
- Can be mounted on the floor, wall, ceiling, or tank
- A six-roller guide outlet protects the hose by reducing wear and preventing pinching during use
- Dimensions of 480mm (W) x 488mm (H) x 195mm (D)
