

203010**240V AdBlue® Tank Pump**

January 2026

The 203010 240V AdBlue® Tank Pump, manufactured in Italy by Piusi, is designed to transfer AdBlue® & water from drums and tanks when a 240V electricity supply is available.

Capable of flow rates of up to 35L/min & with a maximum working pressure of 19psi, the pump has a duty cycle of 20 minutes on and 20 minutes off.

Equipped with an on/off switch, 2 metres of power cable, simply attach supply & delivery hoses (not included) to the 3/4" hose tails, connect to power and the Piusi AdBlue® pump is ready to work.
