220ACB

400g Trigger Action Grease Gun – Clear Barrel

The 220ACB trigger action grease gun is a cost effective alternative for intermittent, periodic and specialised greasing, in particular when using more expensive grease typically used for lubricating food grade equipment and for critical grease points.

The 220ACB with its clear acrylic barrel is differentiated from the traditional grease gun steel barrel and presents the real benefit of clearly identifying the type of grease cartridge loaded into the gun.

A light weight die-cast aluminium head assembly and a slip-type pressure/volume adjustment which changes the gun from high pressure to high volume design are just two user friendly features of the 220ACB clear barrel trigger action grease gun which is also suitable for use with both 400 gram cartridges and bulk grease.

Featuring the patented Ever Flow System enabling the use of thick/tacky greases even at low temperatures and unique Twin Lock System, the German engineered & manufactured 220ACB 400g lever action grease gun is a dependable and proven performer.

PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

Develops grease pressures up to 8,500psi

1.1g delivery per stroke on the high volume setting

0.70g delivery per stroke on the high pressure setting

500g capacity when using bulk grease

Handles up to NLGI2 grease

Three way loading

300mm long grease gun flex

Heavy duty four jaw coupler

Coarse thread on barrel eliminates the chance of cross threading
