PRODUCT INFORMATION

5005AN2 Alemlube Refuelling Drum Pump

2 YEAR WARRANTY

February 2024

The Alemlube 5005AN2 Refueling Drum Pump is designed for the transfer of fuels and lubricants up to SAE30.

This economical and hard working drum pump has a delivery rate of approximately 1L per stroke or approximately 40L/min.

Lightweight, the pump is supplied with 2.4m of delivery hose, a versatile metal delivery spout and a spout holster.

The simple and proven design of the 5005AN2 makes this pump the ideal drum pump for fuel and lubricant transfer in challenging and harsh operating environments.

SPECIFICATIONS, FEATURES AND BENEFITS

- Rowing action drum pump capable of delivery rates of 1L per stroke or up to 40L/min
- Adjustable spout, ABS piston and polypropylene piston seals make the pump suitable for the transfer of diesel fuel, petrol, kerosene, unleaded petrol and low viscosity oils up to SAE30
- Lockable handle eliminates the possibility of unauthorized fuel transfer
- Two piece pick up tube makes the pump suitable for fuel transfer out of 60L and 205L drums or fuel tanks up to 1000mm deep
