

ADDA1200-BM**Direct Drive Air Rewind Hose Reel - Bare**

May 2026

The ADDA1200-BM Direct Drive Air Rewind Hose Reel is primarily used for the delivery of compressed air & various fluids including water, oil, diesel fuel and grease. This series allows for convenient and quick access to different fluids as it can extend the hose to the required length for operation and be retracted after use.

The hose reel can be used in different applications such as in mining, civil construction & oil and gas. These workspaces can be enhanced by preventing hose pile up, improving safety, increasing efficiency, and eliminating or significantly reducing workplace health and safety concerns.

In the construction sector, the ADDA1200-BM can be mounted onto and used around various machinery, trucks, tunnelling vehicles, cranes and other construction machinery.

In mining, it facilitates operations requiring frequent delivery of engine oil, hydraulic oil and gear oil.

Able to assist with hose payout & with hose rewind, the ADDA1200-BM minimises the wear and tear on hose assemblies that would occur through dragging on rugged surfaces, and instead allows for orderly storage and rapid deployment with its pneumatic rewind motor.

SPECIFICATIONS, FEATURES & BENEFITS

- Hose Capacity: 30m x 12mm ID
- Maximum Working Pressure: 3,000psi (207bar)
- Valve Inlet / Outlet: 1" BSPT(f/f)
- Adapters Inlet / Outlet: 1" - 1/2" BSPT(m) / BSP(m)
- Operation: Pneumatic
- Suitable for compressed air, water, oil, diesel fuel & grease* (*up to 2,500psi)
- Includes air control valve

Also available:

- ADDA1900-BM** 30m x 19mm ID Direct Drive Hose Reel - Bare
- ADDA2500-BM** 15m x 25mm ID Direct Drive Hose Reel - Bare
- ADDA25002-BM** 30m x 25mm ID Direct Drive Hose Reel - Bare
- ADDA4000-BM** 20m x 36mm ID Direct Drive Hose Reel - Bare
- ADDA5000-BM** 10m x 48mm ID Direct Drive Hose Reel - Bare

Top mount models & models inclusive of hose also available.
