INFORMATION

FTH1 1" Diesel & Water Farm Tank Hose

December 2025

The Alemlube FTH1 1" Diesel & Water Farm Tank Hose is a durable, weather-resistant hose designed for transferring liquids in agricultural & industrial applications.

Made in Australia & specifically constructed to resist damage from common farm chemicals and outdoor exposure, the hose comes standard in 20m coils ready to go.

With a black PVC nitrile rubber construction with a minimum bend radius of 250mm & a pressure rating of up to 145psi, the FTH1 hose meets Australian Standards AS 2554 Class B & features a 4:1 pressure safety factor.

Ideal for transferring diesel or water from 205 litre drums, overhead gravity feed tanks, skid tank, IBC's and other storage tanks, the fluid can be transferred via air or electric operated pumps, hand pumps or even gravity feed.

SPECIFICATIONS, FEATURES & BENEFITS

- 1" or 25mm ID hose
- Black PVC nitrile rubber construction
- Abrasion, UV & farm chemical resistant
- Maximum operating pressure of 145psi (10 bar)
- Operating temperature range from -50°C to 60°C
- Kink resistant hose maintains flexibility at extremely low temperatures
- Suitable for use with 205 litre drum pumps & overhead feed tanks
- Price is per metre
- Comes standard in coils of 20m of hose
