FTH1P

1" Petrol, Diesel, Water & Oil Farm Tank Hose

December 2025

The FTH1P 1" Petrol, Diesel, Water & Oil Farm Tank Hose from Alemlube is a durable, weather-resistant hose designed for transferring liquids in agricultural and industrial applications.

Made in Australia & specifically constructed to resist damage from common farm chemicals and outdoor exposure, the hose comes standard in 20m coils ready to go.

The integrated copper wire provides anti-static protection by dissipating static build-up during the transfer of fuels which is a key requirement in fuel handling environments. With a black PVC nitrile rubber construction with a minimum bend radius of 250mm & a pressure rating of up to 145psi, the FTH1P hose meets Australian Standards AS 2554 Class B & features a 4:1 pressure safety factor.

Ideal for transferring petrol, diesel, or water from 205 litre drums, overhead gravity feed tanks, skid tank, IBC's & other storage tanks, the fluid can be transferred via air or electric operated approved pumps, hand pumps or even gravity feed.

SPECIFICATIONS, FEATURES & BENEFITS

- 1" or 25mm ID hose
- Black PVC nitrile rubber construction with integrated copper wire for anti-static protection
- Australian made
- Suitable for petrol, diesel, water & oil
- Abrasion, UV & farm chemical resistant
- Maximum operating pressure of 145psi (10 bar)
- Operating temperature range from -50°C to 60°C
- Kink resistant hose maintains flexibility at extremely low temperatures
- Suitable for use with 205 litre drum pumps & overhead feed tanks
- Price is per metre
- Comes standard in coils of 20m of hose
