F20020N 12V Diesel Refuelling Tank Kit - EL Series

*1 YEAR WARRANTY

November 2025

The EL Series F20020N 12 volt diesel transfer pump kit, made in Italy, is designed to be completely portable & with a flow rate of up to 50 litres per minute is a handy economical kit to have on your farm, off road or anywhere when 12V is your only available power source.

Ideal for intermittent diesel refuelling applications, the EL Series F20020N includes 4 metres of suction/delivery fuel hose that can be cut to your desired lengths, 2 metre battery cable and clamps, inlet filter and a plastic manual nozzle.

With a total lift of up to 2 metres the 12V motor has a duty cycle of 30 minutes on, 30 minutes off. The self-priming rotary vane pump with built in bypass can be used to transfer diesel fuel from most drums or tanks.
