Designed with premium aluminium oxide grain for grinding stainless steel and other metals.

The depressed centre design allows the flange/lock nut to recess within the wheel so that it can be used for various grinding applications.

Depressed centre wheels are designed to handle the most severe right angle grinding applications from heavy stock removal to rough blending.

The depressed centre wheels may also be referred to as raised hub wheels.

INOX Iron Free - Grinding (Type 27 Depressed Centre)

- A30S - Aluminium oxide medium grit medium grade
- Excellent depressed centre grinding wheel, for fast stock removal
- For stainless steel & hard ferrous metals
- Durable resin bond designed for grinding while retaining excellent wheel life
- Fillers free of Iron, Sulphur & Chlorine
