AEROSOLS - ZINC

Zinc Cote

Zinc Cote galvanising spray is a high quality, zinc rich coating that contains 93% ultra pure zinc dust by weight in the dried film. This bonds to clean iron or steel surfaces to provide maximum protection against corrosion and rust creepage. A weld-through primer that can be powder coated, Molytec Zinc Cote is suitable for a variety of applications in automotive, marine, industrial, steel and mining industries.

450g Aerosol - **M817**

Silvagal Cote

Silvagal Cote is an industrial strength, anti-corrosive bright silver coating for use on hot dipped galvanised steel products. Molytec Silvagal Cote gives a tough and durable finish with the appearance of newly dipped galvanised steel.

400g Aerosol - **M892**

Molytec Aerosol Trigger

Molytec Aerosol Trigger enables more control for a smooth, professional finish. Includes a 4-finger trigger to minimise fatigue. Features include:

- Ergonomic trigger handle that can be attached to any aerosol can
- Soft touch trigger reduces finger fatigue, ideal for large projects
- Durable construction for repetitive use
- Provides greater spray comfort and control
- Suits standard aerosol 30mm top rim.

Part No - **TR100**

Weld Anti-Spatter

Molytec Weld Anti-Spatter is a heavy-duty water based anti-spatter liquid which provides instant shielding against welding spatter. Exceptional performance, biodegradable product that significantly reduces or eliminates spatter adhesion on weld nozzles, work pieces and tooling. Does not contain no chlorinated solvents or silicones and is non-toxic, non-flammable and will not create porosity or pinholes in welds.
Solvent-free formula which reduces fume formation, is silicone free, easy to clean and paintable, and prevents corrosion, the water soluble formula is economical to use and is non-toxic, non-flammable and eliminates risk of flash during welding. Prevents weld spatter from sticking even after prolonged welds.
