AEROSOL - LUBRICANTS

Slip Slide & Glide

A dry film lubricant with resin-bonded PTFE that provides a thin film of fast-drying film of lubrication. Molytec's Slip Slide & Glide provides lubrication for life in many cases. It inhibits corrosion, resists contamination and does not wash away with water.
It leaves a non-staining thin film that prevents sticking, reducing wear & friction.

160g Aerosol - **M841**

Multilube

Molytec's Multilube is a multi purpose lubricant that sprays on as a liquid which then sets to a tacky grease. Multilube is designed to penetrate into those hard to lubricate places. Ideally suited on boat trailers, chains, cables, garage doors, farm and marine equipment.

350g Aerosol - **M834**

Chain & Cable Lube

A non - fling, water resistant, extreme pressure lubricant for protection on chains, linkages, cables, wire ropes, sprockets, open gears, hoists, conveyors, fork lifts, tractors, farm equipment and is highly recommended in marine and mining environments.

350g Aerosol - **M836**

FOOD GRADE CHAIN LUBRICANT

White Spray Grease

White Spray Grease is an aluminium complex food grade grease designed to give lubrication and protection. The formulation provides good lubrication , water resistance and protection against rust and oxidation. Applications: Ball, roller and needle bearings, hinges, slides, cams, chains, tools, dies, gears, cables, latches and conveyors.

ADF (Air Drying Film)

Molytec's air drying film is pure molybdenum disulphide in an air-drying bonding resin. This fast drying lubricant withstands high loads, provides corrosion protection and with its easy application, ADF is well qualified to coat surfaces where oils and grease cannot be used.
