ALUMINIUM OXIDE

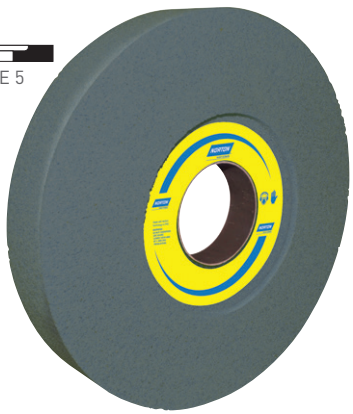

TYPE 1

- Norton general purpose wheels will grind mild to medium hard steels.
  Wheel colour - Brown or Blue/Grey
- 150, 180 and 200mm diameter general purpose grinding wheels come with a multibush bore reducing bush to allow the wheel to be mounted on any model machine. Other wheels can be bushed to the bore size on request.
- For hardened tool steels use a 38A grade wheel.
- Always use the machine guard as supplied by the manufacturer. Alteration or removal may result in an oversized wheel being mounted and run at a dangerous speed.
- Check the machine speed against the maximum RPM marked on the wheel.
  DO NOT OVERSPEED!
