SURFACE TREATMENT

For the pickling of stainless steel welding seams.
It removes annealing colour and welding cinders.
Made in Germany

TS-K GREEN PICKLING PASTE

- Contains Hydrofluoric and Nitric Acid
- Removes the black welding scale / discolouration / corrosion on stainless steel
- The welding seams need to be cleaned properly in order to stop corrosion
- Thick viscous gel with long moisture phase – the longer the moisture phase, the longer the reaction times for a better, cleaner result
- PELOX pickling products do not contain Hydrochloric or Sulphuric Acids and have a low odour (more user-friendly)
- PELOX pickling pastes are very efficient (minimal to no manual cleaning afterwards; only one application is needed)
- PELOX pickling paste has a long shelf-life

SP-K 3000 PICKLING SPRAY

- Contains Hydrofluoric and Nitric Acid
- Removes the black welding scale on stainless steel and other contaminants/corrosion giving a uniform finish on the whole unit
- Suitable for large structures
- Very efficient coverage as only a fine film is required
- Viscous liquid with long moisture phase – the longer the moisture phase, the longer the reaction times for a better, cleaner result
- PELOX pickling sprays do not contain Hydrochloric or Sulphuric Acids and have a low odour (more user-friendly)
- PELOX pickling sprays have a long shelf-life

PART NO.	TYPE
