Wiha Mini PocketStar.

The smallest blade at the push of a button.

The unique opening mechanism facilitates an easy selection of the desired key size.

Who hasn't spent ages looking for the small SW 0.9 hex key or for other small keys?

Wiha has developed an extremely smart solution to solve exactly this problem: the Mini PocketStar, a small practical helper that is an absolute must in the toolbox of every service and customer-service engineer.

Regardless of whether replacing a proximity switch or pneumatic control unit, or whether adjusting the sensitivity of a light barrier. With the Mini PocketStar, all keys are within reach.

Small but effective. The Mini PocketStar from Wiha is the smart helper for service engineers and for DIY use.

The 180° stop limit when working on applications with higher safety requirements puts an end to trapped fingers.

Wiha Mini PocketStar.

- All small keys are held together in the Mini PocketStar. Not a single blade is lost
- Each of the 8 blades can be used as screwdriver when set at 180° and as tool with lever arm when set at 90°
- The glass-fibre-reinforced polyamide holder ensures that the Mini PocketStar withstands every stress unscathed
- Of course, the smallest PocketStar also has the same special functions as the "big" PocketStars

Mixed sets.

SB 351 PM8X **Hex fold out holder Mini PocketStar.**
With additional blades, 8 pcs.
Blister packed.

Blade: Chrome-vanadium steel, through hardened, electro-plated.
Handle: Ergonomic, reinforced fibreglass housing, 55 mm long.
Application: Practical fold out holder for mini keys so they no longer get lost. Particularly suitable for use with the smallest screws, e.g. when tightening screws or for the accurate setting of sensors.
Extra: Robust casing with eject button for simple and easy key selection. Hanging loop with matching snap-hook.
